Basically it's Texas Holdem with the players hole cards dealt FACE UP. This is to insure that there is no cheating, no colluding. This is the easy way to play that gives everyone a better chance to win, and a more fair chance to win.

Starting out, everyone antes, then cards are dealt face up. The best hand at the River wins. So bets increase after the flop, and after the turn.

Not much of a challenge here. No need for bluffing, butting heads with other players, no stress. Just a simple game. Getting right to the point without all the other hassle of the original game.

Fun, easy, and fair. Good luck and thank you for obtaining my wee book.
